

Coca-Cola

Pathway to continuous Bio-Security

Identify

The bottling plant faced contamination risks complicated by species variety, high throughput of 42,000 bottles per hour, and spatial and temporal limitations within existing processes.

Apply

Cognituv designed and integrated a compact, high-fluence fixture into existing machinery to provide rapid, continuous treatment. This solution meets stringent bio-security standards without altering production.

Verify

Continuous radiometric monitoring and alarm notifications via Cognituv Connect confirm consistent treatment levels, establishing reliability and traceability.

Successful Outcomes

- Process not changed
- New Industry standard
- Maintained Product Quality
- Enhanced Risk Management
